A. INTRODUCTION

This publication contains listings of geophysical and geological reports which have been released in accordance with the provisions of the Canada Oil and Gas Act. Section 50(3) of the Act states, in part:

> Information or documentation furnished in respect of the following matters may be disclosed, in the manner prescribed as follows:
>
> (a) in respect of geological or geophysical work performed on or in relation to Canada lands, on the expiration of five years following the completion of the work or on reversion of the lands to Crown reserve lands, whichever first occurs.

For this purpose, the completion of the work is considered to occur six months after the field program is terminated.

B. DATA MANAGEMENT PROCEDURE

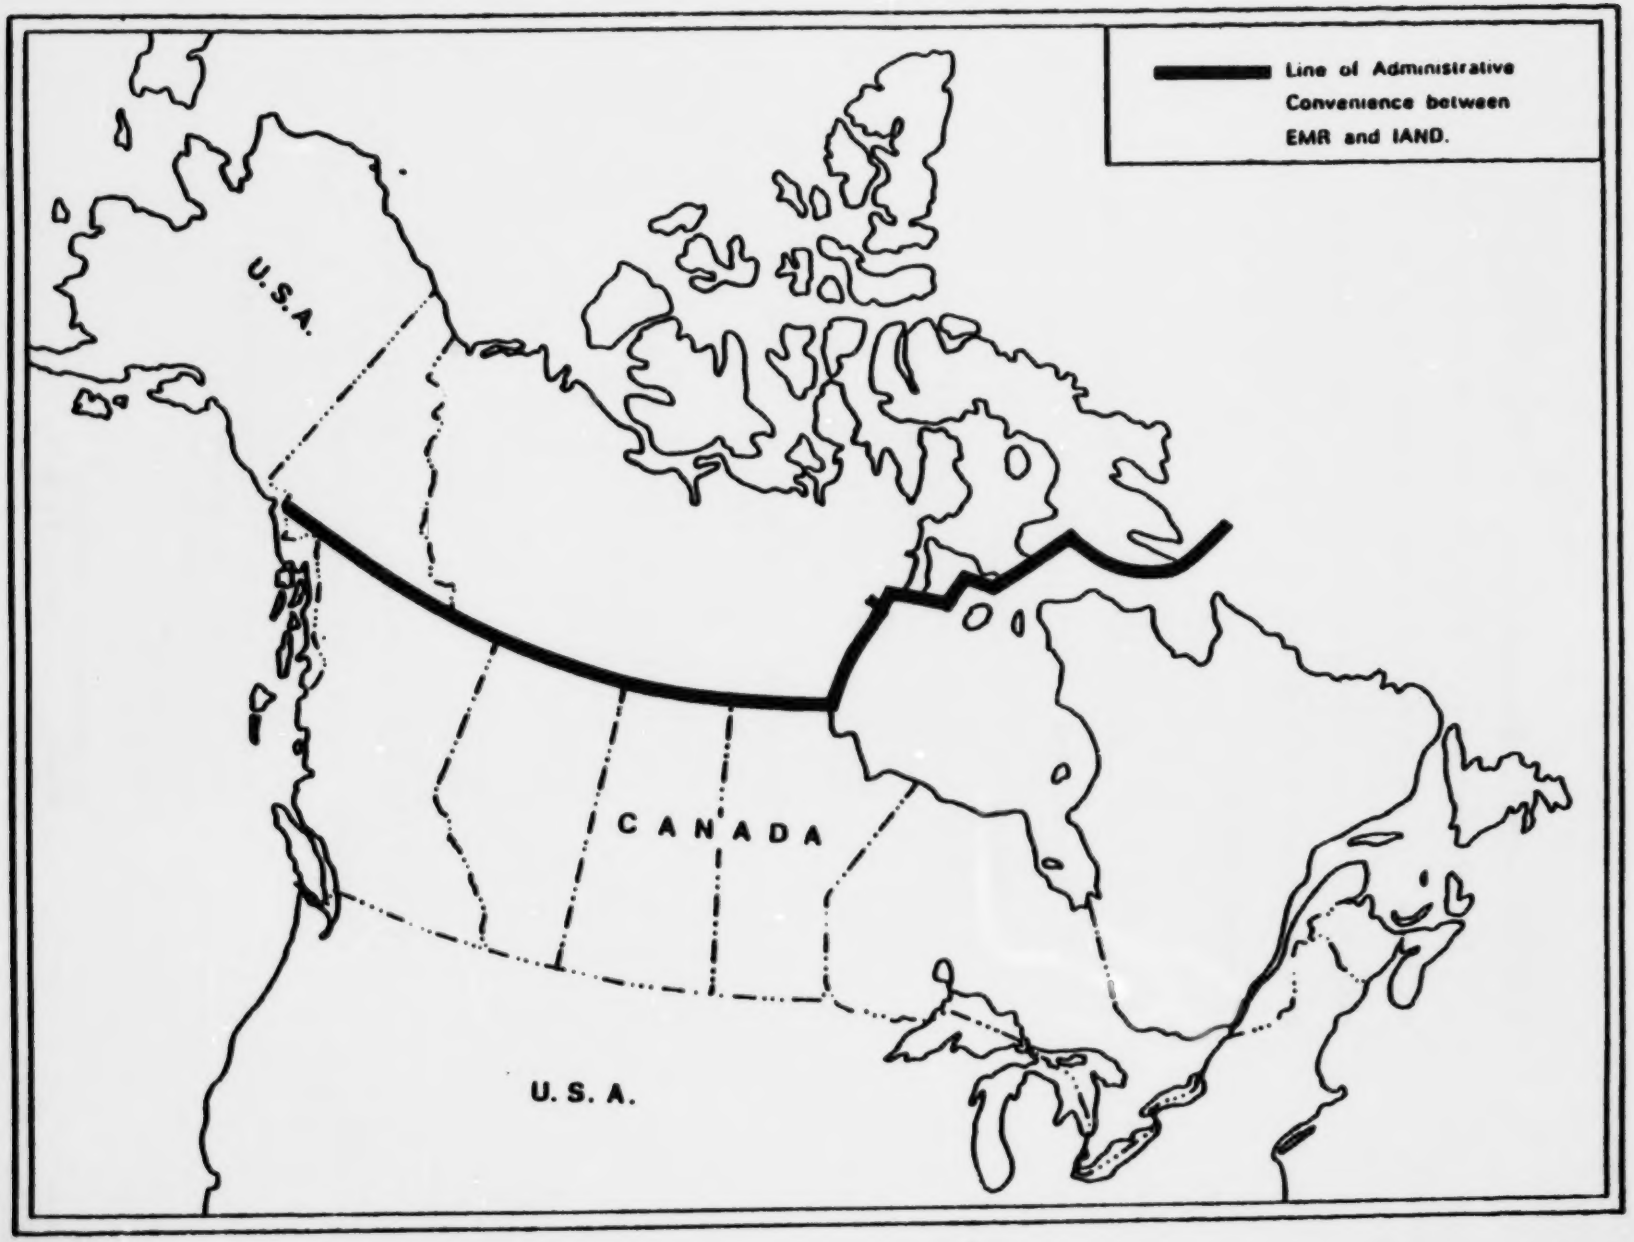
Report Numbers

All geophysical and geological reports from exploratory programs conducted on Canada lands have been assigned a unique report number or project number. This number is coded to provide information on the geographical area of the survey, the type of survey undertaken, the operator, and the project's sequential position in the list of all work of that type done by that operator. Prior to January 1, 1982, report numbers were assigned by either Energy, Mines and Resources (EMR) or Department of Indian and Northern Affairs (DINA) as determined by the geographic location of the program with respect to the line of administrative convenience (see map). Explanations of the number formats are given in Appendix 1 (EMR) and Appendix 2 (DINA).

Report Management - Microfilm Copy

All geophysical/geological reports have been microfilmed for the purposes of archival storage and data reproduction.

Within a report, the text has been reduced to 16 mm negative strips, and maps, seismic sections and profiles have been reduced onto 105 mm microfilm negatives. All reproduction work will originate from this microfilm copy.



Line of Administrative Convenience between EMR and IAND.
U.S.A.
CANADA
U. S. A.

Report Management - Distribution of Hard Copy and Microfilm

The hard copy of each geophysical/geological report and its microfilm copy are stored in Ottawa, in COGLA's registry, and may be examined there. In addition, a microfilm copy of released geophysical/geological reports is available for viewing at the following locations:

(a) Data from East Coast offshore, Hudson Bay, Hudson Strait Regions (EMR jurisdiction); and the Eastern Arctic Offshore Region (DINA jurisdiction):

(i) Canada Oil and Gas Lands Administration
Bedford Institute of Oceanography
P.O. Box 1006
Dartmouth, Nova Scotia
B2Y 4A2

Attention: Gordon Karg
Phone : (902) 426-3179

(ii) Oil and Gas Liaison Officer
Canada Oil and Gas Lands Administration
Room 482, 220 - 4th Avenue S.E.
P.O. Box 2638, Station "M"
Calgary, Alberta
T2P 3C1

Attention: T. Stalinski
Phone : (403) 231-5631

(b) Data from Northern Region (DINA jurisdiction) and West Coast Offshore Region (EMR jurisdiction):

Oil and Gas Liaison Officer
Canada Oil and Gas Lands Administration
Room 482, 220 - 4th Avenue S.E.
P.O. Box 2638, Station "M"
Calgary, Alberta
T2P 3C1

Attention: T. Stalinski
Phone : (403) 231-5631

C. REPRODUCTION OF MICROFILM DATA

Duplication of microfilm materials can be arranged through:

Data Management Division
Resource Evaluation Branch
Canada Oil and Gas Lands Administration
355 River Road
Ottawa, Ontario
K1A 0E4

Attention: H. Johnson
Phone : (613) 993-3760
Telex : 053-4366

Microfilm reproduction will generally be done by a commercial firm who will bill the purchaser direct. The following information is needed in a reproduction request:

- Purchaser:
  - name of company
  - address, phone number, telex number
  - technical contact
- Report number(s) required
- Data required from report(s):
  - text
  - maps
  - seismic lines (specify line numbers unless all required)
- Format of reproduction:
  - microfilm
  - enlargement
    - scale of enlarged maps, seismic sections
    - medium (film or paper)

D. RELEASED GEOPHYSICAL/GEOLOGICAL DATA

The released geophysical/geological data has been tabulated by geographical region, operator and report number or project number. All projects completed before June 30, 1977 are included, with the exception of those located in areas where a moratorium on exploration activity is in effect, and those for which a written commitment for a longer confidential period was made prior to May, 1976. Appendix 3 contains the tabulation for released data in the East Coast offshore, Hudson Bay and Hudson Strait regions. Appendix 4 contains the tabulation for released data in Northern regions. Maps are included which indicate the definition of the geographical regions.

This tabulation will be updated on a six-month basis from January 1, 1983.

APPENDIX 1

EMR CODING OF REPORT NUMBERS

This report number format was used by EMR for all geophysical/geological reports within its area of jurisdiction.

The report number is formatted as follows:

ABCD-EFGH-HI

Each letter corresponds to an alphanumeric code:

A = 8 identifies exploration programs, offshore regions

B identifies geographical region, where:
- 6 = East Coast offshore
- 7 = Hudson Bay, Hudson Strait
- 8 = West Coast offshore

CD identifies type of exploratory work, where:

- 20 = combined geophysical surveys
- 21 = airborne magnetometer
- 22 = ship gravity
- 23 = seafloor gravity
- 24 = seismic reflection
- 25 = seismic refraction
- 26 = shallow seismic geophysical seabed investigations
- 27 = (re) processing, (re) interpretation
- 29 = onshore surveys
- 30 = combined geological surveys
- 31 = offshore geological surveys
- 32 = paleontological/palynological studies
- 33 = geochemistry studies
- 34 = lithology studies
- 35 = purchase of geological studies
- 37 = in-house geological studies
- 39 = onshore geological surveys

EFG operator or company identification

H sequential report for this operator

I project identifiers, where:

E = exclusive project
P = participation project
DT = data trade
DA = data acquisition

For example, a typical report would be coded as: 8624-HI-2E, which identifies a reflection seismic report in the East Coast offshore region conducted by Harris Oil and Gas, and which is the second exclusive project for the company.

APPENDIX 2

DINA CODING OF NORTHERN REPORT NUMBERS (PRIOR TO JANUARY 1, 1982)

This report number format was used by DINA for all geophysical/ geological reports within its jurisdiction prior to January 1, 1982. The report number is formatted as follows:

ABCD-EFG-HI-JK

The letters correspond to a numeric code, where:

ABCD — identifies operator or company

EFG — identifies type of work, with

- 01 - surface geological mapping
- 02 - photogeologic interpretation
- 03 - geological evaluation
- 04 - geochemical surveys
- 05 - offshore geological surveys
- 06 - seismic reflection and refraction, on land and ice
- 07 - aeromagnetometer
- 08 - gravity meter
- 09 - marine seismic, reflection and refraction
- 10 - research geophysical work

HI — identifies the geological region (see attached map), with

- 01 - Liard Plateau
- 02 - Eagle Plain
- 03 - Yukon Arctic Coastal Plain
- 04 - Great Slave Plain
- 05 - Great Bear Plain
- 06 - Peel Plateau
- 07 - Mackenzie Delta
- 08 - Beaufort Sea
- 09 - Arctic Lowlands
- 10 - Arctic Islands
- 12 - Baffin Bay/Davis Strait

JK — Numerical sequence of reports as received from this company or operator

For example, a typical report would be coded as: 053-06-07-00013, which identifies a reflection seismic report in the Mackenzie Delta area shot by XYZ Oils Ltd., and which is the thirteenth report for this company.

APPENDIX 3

RELEASED GEOPHYSICAL/GEOLOGICAL DATA,
EAST COAST OFFSHORE, HUDSON BAY, HUDSON STRAIT REGIONS

The attached tabulation identifies the geophysical/geological data that has been released in the East Coast offshore, Hudson Bay and Hudson Strait regions. In general, seismic sections are available for all programs that were completed since January 1, 1970. For those programs completed in 1969 and earlier, seismic sections are not generally available.

The attached map identifies the eight areas that have been used for the purpose of locating geophysical/geological programs within the East Coast offshore exploration region.

APPENDIX 4

RELEASED GEOPHYSICAL/GEOLOGICAL DATA NORTHERN REGION

The attached tabulation identifies the released geophysical/geological data that has been released in the Northern region. In general, seismic sections are available for all projects that were completed since January 1, 1973. For those programs completed in 1972 and earlier, seismic sections are not generally available.

The map in Appendix 2 identifies the eleven geological areas that have been used for the purpose of locating geophysical/geological programs within the Northern exploration region.
